PROFILE

Third-year Computer Science & AI student at Pharos University in Alexandria with hands-on internship experience in Machine Learning, NLP, and Computer Vision. A collaborative team player with strong problem-solving skills, passionate about building end-to-end AI solutions — from data preprocessing to model deployment. Seeking opportunities to apply and grow skills in real-world AI and data science roles.

EDUCATION

Pharos University in Alexandria

Oct. 2023 – June 2027

Bachelor of Science in Computer Science and Artificial Intelligence — Alexandria, Egypt

Relevant Coursework: Machine Learning · Deep Learning · Probability & Statistics · Database Management · Artificial Intelligence · Linear Algebra · Neural Networks · Computer Architecture

EXPERIENCE

Arabian Academy

Jul. 2025 – Oct. 2025

Data Science Engineer Intern — Alexandria, Egypt

- **Built 5+ ML models** for text classification, sentiment analysis, and image recognition, improving baseline accuracy by 12%.
- **Preprocessed 3 real-world datasets** using feature engineering and selection techniques, reducing noise and improving model generalization.
- **Optimized model performance** using cross-validation and evaluation metrics (F1, AUC-ROC) across multiple NLP and Computer Vision tasks.
- **Collaborated with a team of 4** to deliver project milestones on time, communicating findings clearly through structured reports.

Optical Soft

Nov. 2024 – May 2025

Machine Learning Intern — Cairo, Egypt

- **Trained 3+ deep learning models** for text classification and sentiment analysis using NLP techniques, achieving up to 89% accuracy.
- **Reduced model error rate by 15%** through systematic feature engineering and hyperparameter tuning on real-world datasets.
- **Contributed to 2 production-ready ML pipelines** by collaborating with a team of 5 engineers to design, test, and deploy machine learning solutions.
- **Documented and communicated** technical findings to non-technical stakeholders through clear visual reports and presentations.

PROJECTS

AI BloodScan | github.com/youssef-ali-elfar/AI-BloodScan

November 2025

Python, FastAPI, Flutter, OCR, Machine Learning, Deep Learning

- **Developed an end-to-end AI system** for automated CBC blood test analysis using mobile camera input, covering the full pipeline from OCR to diagnosis output.
- **Compared 3 models** (MLP, TabNet, Hybrid CNN), with TabNet achieving superior interpretability for medical use cases.
- **Achieved 93–96% accuracy on clean data** and 78–85% accuracy on OCR-extracted data.
- **Deployed real-time classification** via a Flutter mobile app with FastAPI backend, making AI diagnostics accessible on mobile devices.

AI-Powered Multiple Disease Prediction Web App | github.com/youssef-ali-elfar/Multiple-Disease-Prediction

October 2025

Python, Scikit-learn, Streamlit

- **Predicted 3 diseases** (Diabetes, Heart Disease, Parkinson's) with 85–92% accuracy using optimized Scikit-learn pipelines trained on real medical datasets.

- **Deployed a live web app** using Streamlit with an intuitive UI enabling non-technical users to interact with AI predictions effectively.
- **Demonstrated practical AI in healthcare** decision support, bridging the gap between ML research and real-world clinical usability.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Machine Learning: Supervised Learning, Unsupervised Learning, Classification, Regression

ML Libraries: NumPy, Pandas, Scikit-learn

Deep Learning: TensorFlow, PyTorch, CNN, RNN, LSTM

Natural Language Processing: Text Preprocessing, Tokenization, Sentiment Analysis

Deployment & Tools: FastAPI, Streamlit, Flutter, Git, GitHub, Jupyter Notebook, Google Colab

Soft Skills: Problem-Solving, Teamwork, Communication, Collaboration, Adaptability

LANGUAGES

Arabic: Native

English: Professional Working Proficiency

LEADERSHIP & EXTRACURRICULAR

Hult Prize – Pharos University

2025 – Present

AI Academic Member

- **Led AI-driven solutions** addressing real-world social impact challenges, collaborating with multidisciplinary teams.
- **Applied data-driven approaches** to analyze complex problems and present actionable insights to team members.

Google Developer Student Clubs (GDSC) – Pharos University

2024

AI Member

- **Participated in hands-on ML workshops**, applying deep learning concepts to practical team projects.
- **Strengthened teamwork and communication** by collaborating with peers on AI-driven problem-solving tasks.
